

# KomodoSafe

Many businesses have adopted SaaS (Software as a Service) products because they deliver value faster and eliminate infrastructure set-up, support, and maintenance. Microsoft Office 365 (O365) alone has more than 155 million users and is growing at 3.3 million users per month. According to 451 Group, 74% of SaaS users rely on their cloud provider for backup and recovery or don't backup at all. However, many customers are unaware of Microsoft's Shared Responsibility Model, which makes data backup the customer's responsibility.

## Common Scenarios:

- Did you know that data backup and safety aren't included in your Office 365 subscription?
- Relying only on Microsoft to secure your mail retention creates a security risk.
- How long are you required to keep former employees emails?

## KOMODOSAFE with Veeam Backup for Office 365

Quick recovery of what you want the way you want it! KomodoSafe with Veeam Backup for Office 365 provides rapid recovery of what you want the way you want it! KomodoSafe with Veeam Backup for Office 365 provides rapid recovery of what you want the way you want it!

Assured recovery of individual items KomodoSafe with Veeam Backup for Office 365 provides assured recovery of individual items KomodoSafe with Veeam Backup for Office 365 provides assured recovery of individual items

Proactive monitoring and alerting of issues before operational impact KomodoSafe with Veeam Backup for Office 365 provides proactive monitoring and alerting of issues before operational impact KomodoSafe with Veeam Backup for Office 365 provides proactive monitoring and alerting of issues before operational impact

- Backup Job Status
- Storage quota used
- Issue resolution

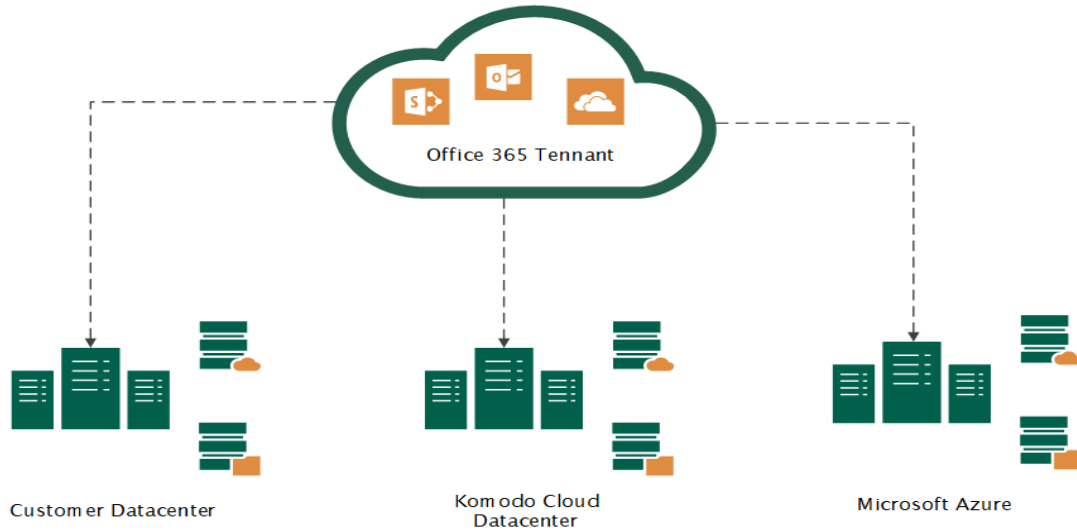

## Staying Protected

Veeam Backup for Microsoft Office 365 uses proven Veeam technology to back up Microsoft Office 365 data, including Exchange Online, SharePoint Online, OneDrive for Business, and Microsoft Teams, simply and cost-effectively. This eliminates the risk of losing access to business-critical data, allows for quick recovery of individual items, and enables eDiscovery of Office 365 data to meet legal and compliance requirements.
